

MICHAEL MCCARDELL

Programmer and Technical Support Expert

Programmer with 3 years of experience in gameplay programming, specializing in building combat and in-game commerce systems for RPG & JRPG prototypes and leading gameplay teams to milestone demos. Skilled in C#, C++, and Blueprint code review, roadmapping, and coordination to reduce integration friction and keep features moving. Additional experience in technical support call centers for several years.

EMPLOYMENT HISTORY

VOLUNTEER GAME PLAY PROGRAMMER

Nov 2025 – Present

Forbidden Kimono Studio

Remote

- ◆ Implemented lock-on and in-game shop systems for a third person action RPG-style project, improving combat flow and processing player item transactions.
- ◆ Acted as lead programmer on an unannounced turn-based JRPG, coordinating gameplay code and driving completion of 3+ milestone demo features within deadlines.

VOLUNTEER DIRECTOR OF PROGRAMMING

Mar 2025 – Oct 2025

VECTOR Interactive Entertainment

Remote

- ◆ Lead programmer on upcoming Artema game
- ◆ In charge of distributing tasks to other programmers and ensuring tasks are constantly in progress
- ◆ Assist other team members with other tasks
- ◆ Established coding standards and C++/Blueprint review checklist to reduce integration conflicts.
- ◆ Designed project roadmaps for Artema, defining milestones, deliverables, and technical QA gates.

VOLUNTEER GAME DEVELOPER

Apr 2024 – Jul 2024

Inchworm Games

Remote

- ◆ Examine game design documentation, build games proposed, advise on changes and/or improvements that can be made
- ◆ Built Unreal Engine 4 blueprint systems for collectible pickups that integrated with save-game logic.
- ◆ Tested builds across platforms, logged reproducible bugs, and verified fixes

BUSINESS TECH SUPPORT AGENT

Jul 2024 – Apr 2026

Metronet

Remote

- ◆ Answer calls and assist business clients with remote tech support needs regarding internet and phone connections
- ◆ Resolved 30+ weekly customer connectivity incidents using ticketing system and modem diagnostics.
- ◆ Coordinated with field technicians to schedule 120 service appointments and reduce repeat visits.
- ◆ Escalated complex outages to network engineering and tracked progress until full service restoration.

L2 TECH SUPPORT AGENT

May 2016 – Jun 2021

One Support

Remote

- ◆ Answer calls and walk customers through basic trouble shooting for FIOS TV, FIOS phones, FIOS internet, DSL, and land line phones. If trouble shooting was not successful, wrote orders to ship replacement equipment to customer or scheduled a field tech visit as needed.
- ◆ Mentored new Level 1 agents on ticket escalation rules and call documentation standards.
